PRESS RELEASE

Launch of SPACES - Creating Spaces for Creativity project

SPACES – Creating spaces for Creativity is a highly innovative 24-month project, co-funded by the Erasmus+ programme of the European Union. The project started on the 1st of April 2021 and is expected to be completed by the 31st of March 2023.

The project consists of 6 partner schools/education institutions from 5 different countries (Fundacja Rozwoju Edukacji Spatia, IX Liceum Ogólnokształcące im. Wisławy Szymborskiej w Sosnowcu (both in Poland) Malatya Bilim Ve Sanat Merkezi (Turkey), Edmund Rice College, CulturePolis (Greece) and Escola Básica e Secundária Padre Manuel Álvares (Portugal)), all of which have areas of expertise necessary to achieve the objectives and activities of the project.

The aim of the SPACES project is to contribute to the creation of a friendly space for the development of creative thinking skills and quick adaptation through the exchange of experiences and good practices in this area between non-governmental organizations, educational institutions and organizations from the cultural and creative sector that deal with formal, informal, and non-formal education.

The Intellectual Outputs (IOs), which will be produced during the lifetime of the project include the following:

IO1: How to learn creatively?

IO1 will consist of a handbook for secondary school students, containing elements of theory and practical exercises and tests (e.g., creativity texts or learning styles).

IO2: How to teach creatively?

IO2 will consist of a handbook for teachers and educators, covering areas of training and guidance material on topics mainly concerned with creativity and education.

IO3: How to create creative space?

IO3 will present good solutions and recommendations in organising school environments (inside and outside) to foster creativity and effective learning.
